DMITRIY MARKUS

1840 E. 13th St. #6F, Brooklyn, NY 11229 [646] 645-1268 | markus.dmitriy@gmail.com

SUMMARY

I rapidly iterate between design and development to create re-imagined web experiences on all screens

EXPERIENCE

Full Stack Engineer & UX Designer, Dubspot Music School

New York, NY

August 2012 - Present

- Designed user experiences for both customer and employee facing software
- Designed and built custom front and back-end web applications and school management components for employee use
- Designed and implemented a private REST API which powers the school management system
- Integrated 3rd party services such as Stripe, Paypal, AgileCRM, Zendesk and Mailchimp into business processes and applications
- Provisioned and administered several servers, tech stacks and environments on Amazon Web Services
- Planned, oversaw and implemented several infrastructural upgrades and migrations of Dubspot's web properties
- Managed legacy systems running on a custom application along with WordPress, Moodle and Google Docs
- · Worked and communciated with multiple departments throughout the company to complete projects

Freelance Web Desginer & Developer

New York, NY

August 2011 - Present

- · Designed and built several projects for clients and personal development
- Projects included a web comic site, a music sorting app, several ecommerce sites and more
- Work at many levels of the design and development process on each project and have broken down my experience by skill below

RELEVANT SKILLS

- DEVELOPMENT
 - Proficient with HTML, CSS (including SASS) and JavaScript (including ¡Query)
 - Use Foundation and Bootstrap to quickly prototype ideas for user feedback
 - Strive to create living style guides and reusable pattern libraries when possible
 - Write client-side apps with Ember and Angular
 - Write server-side apps and REST API back-ends with Laravel (PHP) and Rails (Ruby)
 - Write CMS-based apps with WordPress and Craft
 - Write integration tests and adhere the principles of TDD and BDD
 - Incorporated the Stripe, Mandrill, Twitter, Soundcloud, Facebook Graph, Google APIs in various projects
 - Use modern development workflows with Gulp, Grunt, Browsersync, Yeoman, Bower and NPM
 - · Use git and github for version control and have contributed to open source projects
 - Design and administer MySQL & PostgreSQL databases
 - · Provision and administer servers running different stacks on Ubuntu with Nginx and Apache
 - Deploy and manage servers with Digital Ocean and AWS

DESIGN

- Design and decide in the browser
- · Wireframe and design websites with Sketch, Photoshop and OmniGraffle
- · Sketch ideas with pen and paper
- Map-out processes, experiences, user journeys and more with OmniGraffle to brainstorm and communicate ideas
- Design user experiences along with the infrastructure and system architecture required to bring each project to life

PERSONAL

- · Almost entirely self taught and able to quickly pick up any new skill and technology
- Extremely driven and find motivation in my love for my work

EDUCATION

BBA, Zicklin School of Business, Baruch College (CUNY)

New York , NY

Major: Computer Information Systems, GPA: 3.7 / Minor: Philosophy
